**Our Mission**

The Rapides Foundation is a community resource dedicated to improving the lives of Central Louisiana citizens through financial support of worthy projects.

Our vision is to be a perpetual resource for exploiting opportunities that strengthen health and well-being, education, and the arts and humanities.

Our mission is to improve community health and brighten the future through building capacity to resolve local challenges in Central Louisiana.
### Program Priority Summary

#### Healthy People

**Healthcare Access**
An unacceptable number of community members cannot get the medical, dental and mental health services they need as a result of one or more of the following: lack of private insurance, shortage of available Medicaid providers, long waiting times for appointments with publicly-funded services, cost of medication, problems getting to services and, in some cases, shortages of certain types of medical, dental and mental health professionals.

**Healthcare Access Infrastructure**
The availability and affordability of local healthcare services is constantly being impacted by changes in state and federal funding. The Foundation may support assessments and programs that seek to better integrate systems of care for all community members, with specific emphasis on new or enhanced systems for the uninsured and underinsured.

**Health Promotion and Disease Prevention**
The historic public health work by William Foege and J. Michael McGinnis has conclusively demonstrated that at least 50% of all illness and death is directly connected to lifestyle choices. Proposals are particularly encouraged that clearly identify and link existing services in ways that make these services understandable, comprehensive, and effective.

**Participatory Arts Programs**
Increasingly, clinical health professionals and health educators are effectively incorporating professionals from the artistic disciplines as part of both preventive health practices and disease treatment programs.

#### Education

**K-12 Grants Programs**
Although closed to new schools, the Foundation currently has grants with about 100 K-12 schools.

**Systemic Change Initiative**
To engage school districts more deeply in the type of school improvement work that the Foundation has supported over the last five years through its K-12 grants.

**Educators Leadership Institute (ELI)**
A number of local school districts are participants in a challenging and intensive program of learning and planning under the umbrella of ELI all focused on improving instructional leadership.

**Local Education Fund**
The Foundation is in the process of establishing a new organization to provide meaningful opportunities for local engagement, with the goal of providing a permanent home for local efforts supporting higher student achievement.

#### Healthy Communities

**Citizen and Nonprofit Training and Organizational Development**
The Foundation funds these activities under the umbrella of Community Development Works (CDW). CDW offers a variety of training programs and resources for both inexperienced and experienced community members and organizations interested in promoting positive community change. On a limited basis, the Foundation will consider proposals for operating funds from new or developing organizations who have, as their primary focus, the improvement of neighborhood or community standards of living.

**Workforce Development**
The grants program pushes employers to develop creative solutions for any perceived shortcomings that impact employee wage-earning potential and, concurrently, business productivity. Ultimately, the Foundation's interest in this area correlates the ability to earn a higher wage with other indicated measures such as home ownership and the ability to purchase health insurance.

**Effective and Innovative Business Environment**
The Foundation will consider funding requests for projects and programs that can raise the knowledge levels of employers and focus the community on legitimate higher wage economic opportunity. Some examples of these types of projects might include coordination and development of: small business incubators, business learning networks, industry-led alliances, joint apprenticeship programs, ISO certification teams, entrepreneur networks, seed capital funds, among others.

**Arts and Culture Infrastructure**
Although the Foundation is not accepting proposals for new funding in this area, we will continue involvement with three important programs: 1) A Regional Arts Council, 2) Affordable office and performance space at The Rapides Foundation Building, and 3) A Performing Arts Center in downtown Alexandria.

**Community Data, Information and Resources**
A great deal of the activity of the Foundation reflects our role as a broker of information. From early in the Foundation's history, we have emphasized the power of fact-based decision-making in everything from targeting a nonprofit's outreach efforts to developing plans for locating healthcare and counseling services. We have invested both time and funds in the development of various assessments, surveys and databases. All of these are available to community members through the Foundation's program department.

### Eligibility Requirements

The Foundation will award grants to organizations which are tax exempt under IRS Section 501(c)(3) and are not a private foundation as described under Section 509(a). Public agencies that meet additional criteria may also receive grant awards.
For most people in today’s busy world when they hear the word “connection,” they think about their Internet provider or cell phone. For our Foundation, it brings to mind something different - it is “the learning connection” that is woven through the work we do with people and organizations in our communities.

Much of what you hear and read about the Foundation’s work ends up focusing on learning, whether we call it training as part of a discussion about our higher wage development efforts, or skills building when working with grassroots community members in our Community Development Works program, or sharing of best practices when teachers, principals and superintendents get together for an intense look at their own schools. It’s all learning and is, in many ways, the long-term strategy (and opportunity) for improving the health and well-being of Central Louisiana.

CMAP - While we are pleased that we can announce over 6000 people (end of 2002) had a consistent and reliable source of medication (where no help was available previously), we are especially proud to say that we have seen substantive progress in having medically at-risk residents learn how to take better care of themselves. Everything the experts know about health improvement says that people have to take ownership over their own health - that a handout only goes so far. We believe the CMAP model of medication access, with its heavy emphasis on pharmacist education and client learning is a strong model for the community about individual empowerment.

AEDs - In the pages of this report, you will see a photo of a proud and thankful survivor of cardiac arrest, Mr. Ray Yates. Through the intercession of some committed community members in Olla, Mr. Yates was brought back to life. He has taken it upon himself to become one of the area’s most enthusiastic spokespersons on the need for everyone to learn CPR and AED operations. By the end of the year, over 2000 people had been trained, with thousands more scheduled for 2003. Once again, while the Foundation did conclude the first phase of its partnership with the American Heart Association, placing 225 AEDs with First Responders, the long-term value of the program is in the individual learning and group learning that has pulled together communities for new and more effective ways to respond to medical emergencies.

RETREAT AND COMMUNITY DEVELOPMENT WORKS (CDW) - And learning shouldn’t just be for the community. Our Foundation needs to constantly be looking at what we do and how we do it - and learning from those experiences. As an example, we held over 60 CDW trainings in 2002 in every parish on almost every day of the week. We learned a lot - both during and after the year was over as we tried to quantify how
the participants were using what they had learned. As a result, we have revamped the CDW training schedule with programs that are more specific to the needs of the audience and are more “action-oriented.”

And in October, the Board of Trustees met for their first real analysis of what we have learned since our initial formalized program of grantmaking was implemented back in 1998. They heard from senior staff and advisors on our progress, challenges for the Foundation and community, barriers to moving ahead and opportunities for the future.

We learned a great deal and have made some major steps towards sharpening our focus for the next five years. Some of those changes are reflected in the new grant guidelines, Program Interests and service area geography that you see mentioned in the pages that follow. Expect to see a lot of information about the implementation of those changes in the 2003 Annual Report.

As part of the Retreat Planning, we revisited the initial Community Health Assessments that we informally refer to as the Tulane Study. We worked with PRC, a leading national healthcare information firm, to put together an update that helps our staff and Board, but more importantly, gives community members a base for learning about the health of the community. The Assessment information is available at www.rapidesfoundation.org.

EDUCATION – Our Education work continued in 2002 with over 100 schools and with a new learning vehicle – the Educators Leadership Institute (ELI). ELI puts together key school leaders from within a parish and moves them quickly towards making important changes in the learning environment based upon proven strategies from districts like Brazosport, Texas where underperforming districts have rapidly turned their systems around with a renewed commitment to learning and achievement. 2003 will also feature expansion of our educational work with the development of a Local Education Fund and a Systemic Initiative - both of which will be innovative efforts aimed at increasing professional development opportunities for educators across Cenla and improving student achievement.

NEW DIRECTIONS - Increasingly, we are being asked by community leadership to serve as a facilitator or “honest broker” as the region faces serious challenges in areas like healthcare access for the indigent, economic development, and nursing recruitment and retention. In 2002, our Trustees confirmed that this was an appropriate role to play in those cases where the Foundation can provide added value to the discussion, either as a facilitator and organizer or as a provider of data and best practices. In 2003, we will be actively involved in high visibility public efforts in many of the issues already mentioned.

As our Foundation prepares for these new directions, we will continue our commitment to “the learning connection” - and use all these lessons to strengthen the work we do.

Philanthropic Objectives of The Rapides Foundation

The Rapides Foundation will develop Initiatives and award grants which are judged to advance our philanthropic objectives in three areas of interest:

**HEALTH & WELL-BEING**
To promote healthy behavior, improve access to quality, affordable healthcare, foster a safe and caring community, and build capacities that enable people to address local concerns.

**EDUCATION**
To encourage the attainment of knowledge and skills and the practice of responsible citizenship through access to effective learning opportunities.

**ARTS & HUMANITIES**
To enhance appreciation, presentation and participation in artistic and cultural activities.
By the end of 2002, over 6000 local residents were routinely getting their medicines through the Cenla Medication Access Program (CMAP) - one of the largest rural medication assistance programs in the nation. But getting people the medicine they need is only half the battle. CMAP program staff, along with their colleagues at Huey P. Long Medical Center and community sites throughout the area, are heavily invested in promoting the proper use of medication in the treatment and maintenance of chronic diseases like diabetes and high blood pressure.

CMAP pharmacists Sue Fontenot and Kevin Brown sit down with the majority of CMAP card program members at enrollment and then every six months for an in-depth discussion of an individual’s health, medication and understanding of how and when to take their medications. Many problems have already been mended or averted when the pharmacists catch drug interactions, duplicate prescriptions and improper dosage, for example. The members learn how to take better care of themselves by learning how their behavior makes their medications most effective.

After all, what good is getting people medicine unless they have a regular source and know why they are taking it, when to take it, and how to take it? Early results show a decreased use of emergency rooms, more members that keep their doctor’s appointments and better controlled diabetes, high blood pressure and cholesterol.

Early results show a decreased use of emergency rooms, more members that keep their doctor’s appointments and better controlled diabetes, high blood pressure and cholesterol.
We are very proud of the fact that the Foundation, in collaboration with the American Heart Association, has placed 225 Automated External Defibrillators (AEDs) with over 90 volunteer fire departments, sheriff’s deputies and other First Responders throughout rural areas in Central Louisiana.

Ray Yates, a retired sawmill foreman from Olla, was saved through the quick and skilled intervention of Olla Police Chief Gary Taylor, Assistant Chief John Stott and LaSalle Parish Sheriff’s Deputy Terry Keene. They knew what to do because their community commitment led them to invest time in being trained in the Chain of Survival - Early Access to 911 - Early CPR - Early Defibrillation - Early Advanced Care. Through the Operation Heartbeat AED project, over 2000 area residents have been trained in CPR/AED.

THE AED NETWORK

Staff at the Avoyelles Parish Correctional Center are learning how to save lives through a CPR and AED certification program.
We recognize that the AED is not a miracle cure for cardiac disease, which is all too prevalent among Central Louisiana residents. But the units are a key component of a sustainable community health system for our rural residents. In 2003, we will tackle an even more challenging project - placing AEDs in the hands of trained volunteers at churches, schools, public places and businesses. Thousands more residents will be trained in these lifesaving skills. Healthy communities all have people who want to learn how to do more for themselves, their families, their neighbors and the strangers across town.
2002 marked the fourth year of our grant-funded work with over 100 K-12 schools in the region. Many of the schools are making remarkable progress towards their goals of improving student achievement by focusing on implementing school-specific strategies for improvement in areas like math, reading and technology. We are very happy to report that almost all the schools have stuck with the five year program as we all recognize the challenges of the work and the need to sustain the progress.

2002 also marked the start-up of ELI - the Educators Leadership Institute. These parish-wide teams of educational leaders (superintendents, district staff, principals and teachers) are studying and piloting best practices strategies for school improvement that will prove to be effective on the district level. We started out with six parish teams and will add an additional four in 2003.

Also in 2003, we will work toward the establishment of the area’s first Local Education Fund (LEF). The LEF will be an independent nonprofit organization dedicated to regional school improvement. Local Ed Funds have been very successful in other communities as a way to raise funds for schools, lead continuing education and curriculum improvements and serve as high profile community advocates for public education.

The Foundation’s interests in workforce and economic development all go back to our initial vision of being a philanthropy that supports both individual (Healthy People) and community health (Healthy Communities). In our workforce development grants program, we continue to work with employers like Martco, Cleco, Afco Industries, Boise Cascade, Alliance Compressors, Cabot Corporation, Trus-Joist and Cooper-Cameron to help current and prospective employees to increase skills, move up the ladder more quickly and earn higher wages. The companies can logically support higher wage employment when their employees are more effective.

Participants in the Fast-Track Auto Technician program in association with Louisiana Technical College-Alexandria will have good jobs waiting for them.
In 2003, we will begin the second phase of our economic development program which will support learning and organization around effective business practices, from the technical, like ISO certification, to a renewed effort to focus economic development efforts in the region on the practical and attainable. We are constantly posing the following: Does a proposal have a reasonable chance of producing higher wage jobs? Does the project take advantage of whatever competitive advantages the area may have? Already, we are working with the Forest Hill nursery growers to assist in developing new marketing tools and are the lead funder in the establishment of the region’s first small business incubator. And in our first work with smaller employers, four independent auto repair shops are actively supporting the development of a fast-track class of well-trained auto repair technicians to meet the ongoing shortages of qualified personnel in their industry.

The Central Louisiana Business Incubator received funding from the Foundation’s Workforce Development Initiative to help develop fledgling businesses to a level of self-sufficiency and graduate them into the community with high-paying jobs.
New graduates of Central Louisiana nursing schools are routinely employed at salaries above the local median income. Local employment opportunities are relatively plentiful in a wide variety of healthcare settings. Yet local colleges are graduating only half of the nurses they were five years ago and high school principals and counselors report little interest in nursing as a career. The bright high school student with a solid science background is no longer considering nursing. Why?

What has been a national issue for a number of years is hitting Central Louisiana. Healthcare employers are struggling to be able to provide the number and quality of services to meet patient needs. In response, the Cenla Nursing Workforce Coalition has been formed with an $800,000 grant from the Foundation. The goals of the Coalition are to (1) increase the number of local residents attending and completing nursing school, (2) to improve the local image of nurses, and (3) to help employers get and keep the nursing professionals needed for today’s and tomorrow’s healthcare service.

This is an innovative employer-run group with hospitals, long-term care and home care agencies coming together for mutual benefit. The group is investing considerable time and energy in learning about successful nurse development strategies in similar communities around the country. Without a doubt, there is tremendous potential in Central Louisiana for development of more quality nurses at all levels of training. And those opportunities are some of the most rewarding jobs in the area, as well as filling a business and human need.

Collaborative Divorce

Judge Ross Foote, on behalf of the Ninth Judicial District Court, leads a group of trained attorneys and other professionals, to help families reach a better decision for their children and themselves.
In its first year of full operation, CDW developed and conducted training and leadership programs for over a thousand local residents - with particular emphasis on our rural citizens. As the nonprofit development arm of the Foundation, CDW’s work helps a wide range of people and organizations, all devoted to making their communities better places to live.

Community Development Works (CDW)

2002 was our pilot year and we have learned a great deal about when and how to provide effective assistance. In 2003, with the help of our new Community Advisory Board, we will roll out new programs and trainings that respond to these lessons learned.

Charles King, MSA, is the director of Children’s Mental Health Services at Volunteers of America in Alexandria and a 2002 graduate of the CDW program. He oversees programs that help children with emotional or behavioral problems and assists parents to keep them functioning within their communities.
Some of the community success stories in 2002 are the graduates of the six month Nonprofit Management Program in association with LSU-A and LSUS, and the year-long Leadership for a Healthy Cenla Program. Join us in congratulating the graduates listed on these two pages.

2002 Nonprofit Management Program Graduates

D.C. Sills
Executive Director
Louisiana Youth Prevention Services

Elaine DeLoach
Board President
Girl Scouts of Central Louisiana

Daisy Dempsey
Director
Community Senior Citizens Multi-Purpose Resource Center, Inc.

Scott Emery
Captain/Administrator
Cotile Volunteer Fire Department

Herbie Lou Flynn
Executive Director
The Extra Mile, Region VI

Curman Gaines
Executive Director
Central Louisiana Business Incubator

Lisa Harris
Board Member
YMCA of Central Louisiana

Roy Heath, Ph.D.
Interim Director, Faith and Health Program
Louisiana College

Cindy Hilger
Director, Health and Hospitals Office of Public Health

Charles King
Program Director
Volunteers of America

Tricia Lopez
Marketing/Business Manager
Family Playhouse

Ann Lowrey
Executive Director
Central Louisiana AIDS Support Services

Killy Manganaro
Project Coordinator
Hope House

Suelynne Mickey
Executive Director
Girl Scouts of Central Louisiana

Denny Moore
Executive Director
Life Share Blood Centers

Ron Smith
Chairman
Central Louisiana Business Incubator

Wanda Ozier
Executive Director
Hope House

Note: Places of employment were at time of graduation from program, and may have subsequently changed.
Leadership for a Healthy Cenla - 2002 Participants

Allen Parish
Sandy Ray
The Health Enrichment Network
Oakdale

Gerald Simon
Allen Parish School Board
Oberlin

Avoyelles Parish
Bruce Coulon
Coulon's Electrical
Bunkie

Micheal Jordan

Neil Early
NSU Leesville/First Christian Church
Leesville

Doug Stannard
West Central Broadcasting Company
Leesville

Winn Parish
Tony Acosta
Winn Parish Medical Center
Winnfield

Sandra Golf
Winnfield Kindergarten School
Winnfield

Note: Places of employment were at time of graduation from program, and may have subsequently changed.

Micheal Jordan, 2002 Leadership Program graduate, is Director of Silent Love Ministries, an Avoyelles parish nonprofit working to help the needy.
In 2002, we finished a year-long update of the original 1997 Community Health Assessment. Updating information for our own internal use and getting information to meet the needs of current and future grantees was one important goal. Just as important was a need to get this information out to a broader set of residents - for learning, teaching and taking action.

The 2002 Community Health Assessment is available on-line through our Web site at www.rapidesfoundation.org. Foundation staff can also assist in accessing a password-protected Question and Answer system that can quickly and efficiently get you the information you need for your individual community or parish. The Web site features many other helpful data links to local, state and federal health, economic and census information. These are featured under the Resources tab.

In summarizing the findings, the chronic health conditions that are pervasive throughout the area continue to overwhelm the local health systems. Emergency room use is far greater than in other parts of the state and country, for example. Diabetes measures have gone up 50% since our 1997 assessment. We continue to strongly emphasize the use of good information to help attack problems and find solutions. We believe that as a result the problem solving capacity of the communities is being enhanced.

Effective August 2003, the number of parishes served by the Foundation was reduced to nine. This action was taken after much deliberation by the Foundation’s Board of Trustees. It was determined that the Foundation can have a greater impact through its grantmaking efforts if the geography is consolidated and more focus is placed on the remaining parishes.

Healthy Senior Initiatives
Alzheimer’s program set aside (2 years)
Funds assigned for establishment of programs for Alzheimer’s patients and families

Healthy Futures I Initiatives
Food Bank of Central Louisiana (2 years)
Establishment of Kids Café afterschool programs at three Cenla sites

Health and Well-Being Mini-Grants and Technical Assistance (1 year)
Allen Innovative Youth Care Center
Development of youth-operated afterschool program in Oakdale
Central Louisiana Occupational Health Nurses
Organizational and program development for worksite health leader group
Eunice Alfred Ministries
Organizational development and pilot program funds for Rapides Parish-based start-up group dedicated to working with children of incarcerated parents
Food Bank of Central Louisiana
Programmatic development for Kids Café afterschool programs
4 Rivers Youth & Adult Community Association
Organizational development funds for this Jonesville-based community group involved in after school tutoring and LEAP test preparation
Joy Dara Ministries
Organizational development and programmatic development of youth risk-reduction programs
Kappa Alpha Psi Scholarship and Guide Right Foundation
Pilot youth recreation, tutoring and health education programs
Mount Zion Development Corporation
Refinement of afterschool program plans
Ninth Judicial District Court
Pilot project to develop Web site, marketing and training materials for families and attorneys involved in family law cases
Rapides Parish Fire Protection District #8 (Cotile VFD)
Purchase of medically oriented equipment and training materials to be used in collaboration with adjoining departments
Special Olympics Louisiana, Inc.
Identification and assessment of prospective program participants in Cenla
The National Donor Awareness Foundation
Community perception study on attitudes and beliefs regarding organ donation
Tioga Elementary School
Funds for walking trail construction
Tullos (Town of)
Funds for walking trail construction
Economic Development (Workforce) Grants

Alexandria Metropolitan Foundation (1 year) $10,000
Funds for further exploration of intermodal transportation opportunities in Cenla

Louisiana Technical College (Alexandria) (2 years) 100,000
Fast track auto technician training program in association with four independent auto service employers

Louisiana Technical College (Natchitoches) (2 years) 150,000
Years Two and Three of collaborative workforce training project with Martco and Trus Joist as employer leaders

Responsive Grants

Ninth Judicial District Court (3 years) $200,000
To develop and implement a collaborative law process to result in better resolution for families contemplating divorce

Direct Charitable Programs

Programs of importance to be initiated and operated by the Foundation with intent of creating independent nonprofit organizations.

Cenla Medication Access Program (CMAP) $1,912,991*/$4,600,317**
A comprehensive program of medication access and education for low-income residents

Community Development Works (CDW) $461,043*/$1,178,000**
A comprehensive program of leadership development, nonprofit management training and grassroots organizational development

Nursing Workforce Development $800,000***
Establishment of independent employer-led nonprofit dedicated towards promoting nursing as a career, enhancing the quality of the nursing workforce and recruiting middle and high school students into nursing educational programs

* Actual 2002 expenditures
** Three year funding award
*** Two year funding award. Program to begin in 2003.
This is a list of schools that were awarded funding through five year grants under our Education Initiative. Each school is eligible to receive up to $25,000 annually for efforts to improve student achievement.

**ALLEN PARISH SCHOOL BOARD**
- **Allen Parish Alternative Education School**
  To improve student achievement particularly in reading and math. The school will begin with Reading Renaissance.
- **Fairview High School**
  To improve student achievement in reading and math through Reading Renaissance, Math Renaissance and other strategies.
- **Kinder Elementary School**
  To improve student achievement by rethinking curriculum content and developing new teaching strategies in math and language arts.
- **Kinder Middle School**
  To improve student performance in math through new teaching strategies and the expanded use of technology.
- **Oakdale High School**
  To implement a career education program. Included will be a change in the school’s schedule to longer instructional blocks.
- **Oakdale Junior High School**
  To support a whole school reform effort to reorganize the school class schedule, institute interdisciplinary team teaching, and improve class management.
- **Oberlin Elementary School**
  To address low reading performance through expanded professional development in assessment techniques, identifying student weaknesses, and development of individualized interventions.
- **Oberlin High School**
  Beginning in grades 7-8, use the Accelerated Reader to improve the ability of teachers to respond to student needs and to develop appropriate intervention strategies.

**AVOYELLES PARISH SCHOOL BOARD**
- **ALERT School - LaSAS**
  To support program development, organization and staff training on new curricula to meet the needs of at-risk students involving the integration of technology at a new agri-science alternative high school.
- **Avoyelles High School**
  To provide teacher training in use of technology throughout the curriculum.
- **Bunkie Elementary School**
  To improve student test scores through the integration of technology into the curriculum, developing interdisciplinary units and thematic teaching.
- **Bunkie High School**
  To support faculty training for integration of technology into curriculum to improve reading achievement.
- **Cottonport Elementary School**
  To upgrade student achievement in mathematics primarily through integration of technology into the math curriculum.
Lafargue Elementary School
To improve student performance through a multi-year school restructuring project addressing teacher content knowledge, teaching strategies, and integration of technology into instruction. Teaching collaboratives, team teaching, and a re-conceptualization of curriculum changes will be involved.

Mansura Middle School
To assist teachers in effectively utilizing state mandated benchmarks to improve instruction. The focus will include content knowledge and use of technology.

Marksville Elementary School
To improve student reading performance through the use of Spalding and Reading Renaissance strategies in language arts instruction and to institute technology training for students and their parents.

Marksville High School
To provide the training necessary for teachers to incorporate technology into curriculum and instruction.

Marksville Middle School
To improve student achievement in reading comprehension and vocabulary. The school will use an interdisciplinary approach by including reading in all subject areas.

Plaucheville Elementary School
To integrate the use of technology into daily lessons and to develop and then implement the use of thematic units as the foundation for curriculum.

Riverside Elementary School
To restructure the school educational program with a formal, on-going professional development program that will include new teaching methods, new content and problem solving activities to engage students as active learners.

CATAHOULA PARISH SCHOOL BOARD
Jonesville Elementary School
To provide training for teachers for hands-on, minds-on strategies in math, science and social studies.

Martin Junior High School
To improve reading skills in grades 5-8 through a comprehensive professional development program addressing diagnosis and individualized improvement plans based upon student need. The program will include teacher training to integrate reading skills throughout all subject areas, collaborative teaching, classroom management, motivational teaching strategies, etc.

Sicily Island High School
To develop standards-based, career oriented student instruction and learning through a staff training program addressing teaching methods, strategies, integration of technology into curriculum, interdisciplinary lessons and collaborative teaching.

CATHOLIC DIOCESE OF ALEXANDRIA
Sacred Heart School
The school, in a collaborative effort with Holy Ghost School, St. Joseph’s, and St. Anthony’s, will address the technology training for teachers required to integrate technology into instructional strategies across the curriculum.

St. Anthony’s of Padua
The school, in collaboration with Holy Ghost, Sacred Heart, and St. Joseph’s, proposes technology training for its teachers to build new teaching strategies and integration of technology use into everyday instructional strategies.

St. Joseph’s School
The school, in collaboration with Holy Ghost, Sacred Heart, and St. Anthony’s, will undertake technology training for its teachers to build new instructional strategies and integration of technology into the curriculum.

St. Mary’s Assumption School
To train teachers in the use of technology so that students use higher order thinking skills in solving problems across all curriculum areas.

St. Mary’s Catholic School
To provide teachers with new skills that improve student achievement in reading and writing. The school will focus on aligning curriculum and use coaching and project-centered learning activities with a writing emphasis.

St. Rita Catholic School
To improve student achievement through improved instruction in mathematics.
CONCORDIA PARISH SCHOOL BOARD
Ferriday Junior High School
To equip faculty in the use of technology across the curriculum as a strategy for improving student performance and state assessments.
Ferriday Upper Elementary School
To improve reading achievement by developing a comprehensive reading program. The school will begin efforts with training in the Accelerated Reader.
Vidalia High School
To provide teachers with training in the use of technology as a tool for more effective instruction in all curriculum areas.

EVANGELINE PARISH SCHOOL BOARD
Bayou Chicot High School
To restructure the school’s education program to include the school schedule (block scheduling) and teacher training in multi-sensory, integrated learning techniques to actively engage students in the learning process.
Carver Elementary School
To implement character education learning into the curriculum through new teaching strategies.
Chataignier High School
To implement character education through new teaching methods and more active engagement of students in their own learning.
Hester Heath Elementary School
To improve literacy for students using Write Track and Accelerated Reader.
James Stephens Elementary School
To provide faculty with advanced training related to instructional programs curriculum for a cadre of teachers who will then serve as teacher trainers or mentors. The program will initially focus on language arts.
Ville Platte Lower Elementary School
To improve student reading achievement through assessment and diagnosis of student needs and then new program development.

Y-Wolf Project
Y-WOLF stands for Working On Leadership and Fitness. The YMCA of Winn Parish offers this program to students to gain a “YMCA Fitness Leader certification.” Benefits include leadership skills, community problem solving, life long decision making ability, healthy habits, and exercise.

Thomas McGinnis, Winn Parish YMCA director, instructs Y-WOLF members Lacey Johnson (seated) and Catherine Brewton on proper weight lifting techniques.
GRANT PARISH SCHOOL BOARD

Colfax Elementary School
The school effort will focus on improving student performance through the development of small adult learning communities that will emphasize instructional strategies, assessment procedures and changing learning environment.

Dry Prong Junior High School
To implement the middle school model using interdisciplinary teams for instruction to enhance and improve student learning.

Georgetown High School
To improve language skills in grades 5-12 using new teaching/learning techniques. Teacher training will focus on reading and writing activities.

Pollock Elementary School
To improve student achievement in math through the use of hands-on activities and other teaching strategies such as manipulatives.

South Grant Elementary School
To focus on reading achievement using professional development in assessment and diagnosis of learning barriers, alternatives for the learning disabled students, and improved motivation strategies.

LASALLE PARISH SCHOOL BOARD

Fellowship Elementary School
To improve the student achievement through the integration of technology in all curriculum areas.

Goodpine Middle School
To improve student performance by equipping paraprofessionals in the use of more individual and small group instruction in all subject areas.

Jena Elementary School
The school, in collaboration with Olla-Standard Elementary, will institute technology training for teachers focused on the integration of computer use within curriculum and classroom learning activities. Training will include classroom management and interactive learning activities.

Jena High School
To increase student achievement through the use of technology, to provide training for teachers on the full integration of technology throughout the curriculum.

Jena Junior High School
To provide training in the use of technology as an instructional tool to improve student achievement in all subject areas.

LaSalle High School
To increase student achievement through the use of technology, to provide training for teachers on the full integration of technology throughout the curriculum.

LaSalle Junior High School
To provide faculty training in the use of technology as an instructional tool to improve student achievement on state tests.

Nebo Elementary School
To develop a comprehensive reading program by beginning with the Accelerated Reader.

Olla-Standard Elementary School
The school, in collaboration with Jena Elementary, will institute technology training for teachers focused on the integration of computer use within curriculum and classroom learning activities. Training will include classroom management and interactive learning activities.

NATCHITOCHES PARISH SCHOOL BOARD

Cloutierville Elementary/Junior High School
To refine and focus strategies to improve student achievement in reading and writing emphasizing evaluation, assessment and the management of classroom instruction.

Lakeview Junior/Senior High School
To address weaknesses in the language/communications skills of students through the development of strategies for teaching writing across the curriculum.

Natchitoches Central High School
To improve instruction through a broadened curriculum and the implementation of team/multi-disciplinary teaching as well as technology integration.
NSU Elementary Lab School
To improve student achievement through the use of new brain research on how young people learn. It will include changes in class scheduling, assessment methods, new strategies for teachers and expanded use of technology.

RAPIDES PARISH SCHOOL BOARD
Alexandria Middle Magnet School
To plan for and implement a modified middle school model with an emphasis on improving math and reading scores.
Alexandria Senior High School
To build staff knowledge in new strategies and teaching techniques, develop a relationship with the business community and increase communications with parents all focused on improving student achievement.
Arthur F. Smith Junior High School
To implement the middle school concept with training for teachers in academic teaching teams, advisory programs, and interdisciplinary teaching.
Bolton High School
To build staff capacity to implement the Bolton Model: training to restructure teaching, broaden the curriculum content for team/multi-discipline use, and infuse technology in curriculum.
Buckeye High School
To implement technology instruction and learning strategies to improve student critical thinking skills. The focus will be on math.
Cherokee Elementary School
The school will redefine curriculum content and skills by grade level and the connections among them using the Basic School model. The objective is to improve student higher-thinking skills and test scores.
D. F. Huddle Elementary School
To improve student achievement in math and language arts through the development and use of interdisciplinary thematic units and team teaching.
E. C. Hayes School for Exceptional Students
To provide training for special education teachers in new strategies and techniques for special education students.
Glenmora Elementary School
To improve student achievement in reading and math.
Hayden R. Lawrence Middle School
To improve student writing skills through staff training in new standards and approaches of teaching writing skills.
J. B. Nachman Elementary
To improve student reading achievement using the Accelerated Reader and to provide professional development for teachers in reading strategies.
J. S. Slocum Elementary School
To improve student achievement in math by implementing a teacher assessment program to identify areas of weakness, improve teacher content knowledge and then develop instructional strategies.
Mary Goff Elementary
To provide teacher training related to new and more effective teaching and learning strategies to raise student achievement.
Peabody Magnet High School
To focus on student learning centered around career paths, and to upgrade teaching skills to teach within inter-disciplinary clusters.
Pineville High School
To improve achievement and standardized test scores in math with an effort involving eight feeder schools, focusing on new teaching strategies for the math teachers. Secondly, to bring the science department into the project to allow the science and math areas to support and reinforce student learning.
Pineville Junior High School
To implement the “middle school” concept and to provide staff training in team teaching and interdisciplinary learning and project-centered curriculum.
Plainview High School
To provide staff training to improve student achievement in math.
Bruce and Juanita DeKeyzer enjoy Walking Trails such as those being funded by The Rapides Foundation.

Walking Trails

Research shows regular exercise is an important element in any healthy lifestyle.

The Foundation has identified walking as an inexpensive and fun activity that appeals to residents of all ages, in both urban and rural settings.

The Foundation provides matching cash funds of 50% of up to $10,000 for the construction of walking trails. So far the Foundation has funded nine walking trails throughout our service area, at a variety of locations. The groups and settings for these walking trails may be different, they all have one thing in common; the desire to provide a special place where community members can walk their way to improved health.

Evans High School
The school will address the new teaching methods required in order to make the most effective use of time under block scheduling.

Leesville High School
To develop and plan the "career academy" as a means of fostering academic achievement, reducing absenteeism and drop outs, and improving test scores. The grant provides assistance for curriculum development and staff training and support efforts to develop business coalitions.

Leesville Junior High School
To implement the middle school concept, to provide teachers with additional training in understanding adolescent development and individual learning styles.

North Polk Elementary School
To improve student achievement though a curriculum that is built around developmentally appropriate learning opportunities based upon the developmental level of the child.

Pickering Elementary School
To provide staff training to deepen and expand the writing curriculum.

Pickering High School
To improve student reading comprehension and develop critical thinking skills through a program that emphasizes writing across the curriculum.

Simpson High School
To improve student achievement through collaborative team planning and cross-curricular teaching using interdisciplinary approaches.

South Polk Elementary School
To improve student achievement in math and reading. First strategies include Accelerated Reader and Math Renaissance programs.

Vernon Middle School
To improve student achievement in reading and vocabulary through the use of Project Read.

West Leesville Elementary School
To implement a school-wide focus on literature and reading as a means of improving student achievement.

WINN PARISH SCHOOL BOARD
Atlanta High School
To improve student achievement in reading, language arts and English through changed teaching strategies and practices for the whole school. The school will start with and then build upon existing teaching tools such as Accelerated Reader and targeted instructional focuses.

Dodson High School
To develop an aqua-culture/horticulture program emphasizing math and science concepts as the method of improving student performance. Grant funding is used for consultation, curriculum development, staff development costs, training materials, etc.

Winnfield Intermediate School
To develop and implement, in collaboration with the primary and middle schools, a character education effort.

Winnfield Middle School
To develop and implement, in collaboration with the primary school and intermediate school, a character education effort which will include staff development, training materials, etc.

PRIVATE SCHOOLS
Avoyelles Public Charter School
To provide training in the use of Direct Instruction to improve reading achievement of students.

Grace Christian School
To implement a professional development program to build technology skills and to integrate technology use in the classroom so that student learning involves higher thinking skills.
Grant Application Process

Qualified organizations requesting funds through the Program Priority or Responsive Grant Program should submit a Letter of Intent prior to the deadline. Letters of Intent will be reviewed and the applicants will be notified if a full proposal is desired for further evaluation. Applicants will be notified of selection decisions approximately 30 days after the deadline for the Letter of Intent.

Applicants requesting funds for Mini-Grants (up to $10,000) or Technical Assistance (up to $10,000) can submit at any time and a decision will be provided in 60-90 days.

Application materials and eligibility criteria are contained in the booklet entitled, Applying for Funds From The Rapides Foundation. Any group or organization interested in applying for funds is encouraged to call the Program Assistant at 318-767-3013. She will direct your call to the appropriate program staff person. Calls and e-mails are strongly encouraged prior to any formal written submissions.

First Stage: Letter of Intent (Program Priority and Responsive Grants)

Before submitting a Letter of Intent under any of the grant programs, an applicant should request a brochure from the Foundation which details complete requirements and guidelines. Applicants are also encouraged to discuss their project with a Foundation Program Officer.

In a Letter of Intent applicants will be asked to address the following:

- Organizational mission
- Problem or need
- Risk factors
- Desired outcomes
- Strategy
- Sustainability

Selection Criteria

- Successful applicants will look to maximize use of existing local, state and federal funds and services in an effort to develop and sustain more effective systems.
- Successful applicants will demonstrate a high level of knowledge of the issues. They will also be able to demonstrate that they can be expected to manage a program with a good chance of being effective and creating positive change in community health and well-being.
- Successful applicants will propose to develop or provide services to a sufficient number of community residents to make an impact.

Grant Cycle Deadlines

Contact the Foundation for grant cycle deadlines or visit our Web site at www.rapidesfoundation.org.

On the other hand, proposals calling for large grants to serve thousands of individuals across multiple parishes are rarely funded, at that scale. Successful applicants will, at a minimum, recognize the importance of evaluation in developing and supporting services that go beyond goodwill or charity. Start-up organizations are encouraged to apply for pilot and technical assistance support through the Mini-Grant Program. Construction, renovation and equipment purchases are funded only in those unique cases where the capital purchase is a minor component to a larger Foundation program grant.

Applicants with weak or non-functioning Boards of Directors are generally not successful.

Second Stage: Project Proposal (Program Priority and Responsive Grants)

If your Letter of Intent is favorably reviewed, you will be asked to submit a complete Project Proposal on or before the announced proposal deadline. You will have about 60 days to complete the full proposal. This second stage of the application includes a complete business plan with project description, workplan and timeline, staffing and other resource requirements, and an evaluation plan. A project budget and narrative describing the assumptions for preparation of the budget will be a part of the proposal. You will be provided an outline for the proposal requirements as well as a budget worksheet and instructions when you are notified that your Letter of Intent has been favorably reviewed.

Evaluative Criteria

Grant decisions are made through the combined effort of the Budget and Grants Committees of the Board of Trustees and the full Board. Staff provides recommendations to the Budget and Grants Committee based upon some or all of the following procedures: analysis of the written proposal, consultation with experienced program leaders and researchers in the field, site visits and meetings with project staff and Board, and experience with your organization or contributing personnel on prior grants.

Applicants will hear of decisions regarding their submissions via a letter. Award/decline letters will communicate the decisions of the Budget and Grants Committee or full Board and will also include information on various contingencies or pre-funding requirements. Please keep in mind that grant awards may contain significantly different terms of award than originally proposed by your group. Also, a contract (Grant Agreement) must be signed between your group and The Rapides Foundation which spells out requirements and expectations for superior performance.

Decline letters will generally not indicate specific reasons for Committee or Board action. Groups who are unsuccessful are encouraged to contact the Program Department. In many cases, staff are able to highlight certain areas of the proposal that may require additional refinement for program excellence.
